Austin, TX

Designer who makes complex products feel simple and trustworthy for millions of users.

SELECTED IMPACT

Research that shaped strategy - Led a foundational research initiative at **Cerebral** (\$4.8B healthcare startup) on how patients build trust in clinical decisions. Insights shaped a 2-year product roadmap, drove a 26% lift in patient satisfaction, and led to a dedicated research team.

Product transformation - At **Indeed** (world's #1 job site), drove the transformation of a white-glove pilot into a self-serve product. Our product, Interview on Demand, cut time-to-first-interview from 16 days to 22 minutes with 86% trial-to-paid conversion (4.5x industry benchmark).

Redesign at scale - Owned the redesign of the event entry workflow for **AXS** (#2 global ticketing platform, powering Coachella, Lakers, Wimbledon). Improved successful venue entry by 68%, ticket revenue by 13%, and resale revenue by 20% across 55M users.

EXPERIENCE

Forthright • Founder & Staff Product Designer

2026 - PRESENT

Independent product studio focused on 0→1 AI

Designed and shipped Rewind, a 0→1 AI app for physical media collectors, solo from concept to iOS App Store in 10 weeks. The app identifies media from a photo and recommends what's worth buying through five AI reviewers, each with a distinct taste profile, plus a custom-reviewer builder that 67% of users complete. After launch, analytics surfaced stronger demand for cataloging than thrifting, so the product was pivoted into a monetized collecting platform. Built with Claude Code and Figma.

Austin Center for Design • Instructor

2022 - PRESENT

Austin-based nonprofit design school focused on social impact and entrepreneurship

Design and teach UX Design courses including an 8-week AI Prototyping & Testing course; host, speak, and facilitate workshops both locally and nationally.

Indeed • Lead UX Designer

2023 - 2026

World's #1 job site, serving 3.5M employers across 60+ countries

Led UX strategy for Smart Sourcing, Indeed's \$500M recruiter sourcing product used by 5.5M people. Behavioral research showed recruiters were rejecting the results of a matching algorithm they didn't understand. Rather than making the algorithm more visible as stakeholders preferred, designed the matches to blend into ordinary search results. Positive candidate responses rose 29%, and recruiters grew to trust the feature. Redesign also laid the foundation for natural-language LLM search.

AXS • Senior UX Designer

2021 - 2023

#2 global ticketing platform serving 500+ venues

Led UX for the mobile app ticketing SDK (integrated across 28 partner venue apps) and the core AXS app, where research overturned executive assumptions and reduced support calls by 42%.

LegalZoom • Principal UX Designer

2016 - 2021

\$5B legal technology company, 3.7M+ businesses formed

Promoted twice in three years (Senior → Lead → Principal). Led UX for Ribbon, a stealth 0→1 product testing freemium demand. Challenged leadership's multi-month engineering plan, advocating for a Wizard of Oz approach that validated demand in 4 weeks.

Led UX for product partnership with Google Workspace, reaching 7% adoption and \$2M revenue.

Maker Media (Make:) • Senior UX Designer

2014 - 2016

Publisher of Make Magazine, catalyst for the global maker movement

Designed the first social platform for makers; covered by TechCrunch, Engadget, and Fast Company.

O'Reilly Auto • Senior UX/UI Designer

2009 - 2014

Fortune 500 retailer with 6,500+ stores and 87,000 employees

Built the company's first design system and established UX as a formal practice.

COMMUNITY

Austin Impact Day

2025

Speaker, Co-Creating with Intelligence: Expanding Creative Practice with AI

Tulane University School of Professional Advancement

2024-PRESENT
